NEW QUESTION 190

Your network contains an Active Directory domain named contoso.com. All the accounts of the users in the sales department are in an organizational unit (OU) named SalesOU. An application named App1 is deployed to the user accounts in SalesOU by using a Group Policy object (GPO) named Sales GPO. You need to set the registry value of \HKEY_CURRENT_USER\Software\App1\Collaboration to 0.

Solution: You add a computer preference that has a Create action.
Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 191

Your network contains an Active Directory domain named contoso.com. All the accounts of the users in the sales department are in an organizational unit (OU) named SalesOU. An application named App1 is deployed to the user accounts in SalesOU by using a Group Policy object (GPO) named Sales GPO. You need to set the registry value of \HKEY_CURRENT_USER\Software\App1\Collaboration to 0.

Solution: You add a computer preference that has a Replace action.
Does this meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION 192

Your network contains an Active Directory forest. The forest contains a domain named contoso.com. The domain contains three domain controllers. A domain controller named lon-dc1 fails. You are unable to repair lon-dc1. You need to prevent the other domain controllers from attempting to replicate to lon-dc1.

Solution: From ntdsutil.exe, you perform a metadata cleanup.
Does this meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION 193

Your network contains an Active Directory forest named contoso.com. The forest contains 10 domains. The root domain contains a global catalog server named DC1. You remove the global catalog server role from DC1. You need to decrease the size of the Active Directory database on DC1.

Solution: You stop the NTDS service on DC1. You run defrag.exe, and then start the NTDS service.
Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

You need to run ntdsutil.exe with the 'compact to' option.

<https://theitbros.com/active-directory-database-compact-defrag/>

NEW QUESTION 194

Your network contains an Active Directory domain named contoso.com. The domain contains a user named User1, a group named Group1, and an organizational unit (OU) named OU1. You need to enable user1 to link Group Policies to OU1.

Solution: From Active Directory Users and Computers, you add User1 to the Group Policy Creator owners group.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

<http://www.itprotoday.com/management-mobility/what-group-policy-creator-owners-group>

NEW QUESTION 195

Your network contains an Active Directory domain named contoso.com. The domain contains a username User1, a group named Group1, and an organizational unit (OU) named OU1. You need to enable User1 to link Group Policies to OU1.

Solution: From Active Directory Administrative Center, you add User1 to Group1. From ADSI Edit, you grant Group1 Full Control permissions to the "CN=Policies, CN=System, DC=Contoso, DC=com" object.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 196

Your network contains an Active Directory forest. The forest contains two domains named litwarenc.com and contoso.com. The contoso.com domain contains two domain controllers named LON-DC01 and LON-DC02. The domain controllers are located in a site named London that is associated to a subnet of 192.168.10.0/24. You discover that LON-DC02 is not a global catalog server. You need to configure LON-DC02 as a global catalog server. What should you do?

- A. From the properties of the LON-DC02 computer account in Active Directory Users and Computers, modify the NTDS settings.
- B. From the properties of the LON-DC02 computer account in Active Directory Users and Computers, modify the City attribute.
- C. From Active Directory Sites and Services, modify the properties of the 192.168.10.0/24 IP subnet.
- D. From the properties of the Domain Controllers organizational unit (OU) in Active Directory Users and Computers, modify the Security settings.

Answer: A

NEW QUESTION 197

Your company has a main office and three branch offices. The network contains an Active Directory domain named contoso.com. The main office contains three domain controllers. Each branch office contains one domain controller. You discover the new settings in the Default Domain Policy are not applied in one of the branch offices, but all other Group Policy objects (GPOs) are applied. You need to check the replication of the Default Domain Policy for the branch office. What should you do from a domain controller in the main office?

- A. From Group Policy Management, click Default Domain Policy under Contoso.com, and then open the Scope tab.
- B. From a command prompt, run dcdiag.exe.
- C. From Group Policy Management, click Default Domain Policy under the Group Policy Objects container, and then open the Status tab.
- D. From Windows PowerShell, run the Get-ADReplicationConnection cmdlet.

Answer: C

NEW QUESTION 198

Your network contains an Active Directory domain named contoso.com. The network contains several IP subnets. One of the subnets uses a network ID of 192.168.10.0/24. You link a Group Policy object (GPO) named GPO1 to the domain. You need to map a drive to a specific file share on the computers in the 192.168.10.0/24 network only. What should you do?

- A. From the User Configuration node of GPO1, configure the Folder Redirection settings. Link a WMI filter to GPO1.
- B. From the Computer Configuration node of GPO1, configure the Network Connections settings. Link a WMI filter to GPO1.
- C. From the User Configuration node of GPO1, create a Group Policy preference that uses item-level targeting.
- D. From the Computer Configuration node of GPO1, create a Group Policy preference that uses item-level targeting.

Answer: C

NEW QUESTION 200

Your network contains an Active Directory domain named contoso.com. The user account for a user named User1 is in an organizational unit (OU) named OU1. You need to enable User1 to sign in as user1@adatum.com.

Solution: From Active Directory Users and Computers, you set the E-mail property of User1 to user1@adatum.com.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 201

Drag and Drop

Your company implements Active Directory Federation Services (AD FS). You confirm that the company meets all the prerequisites for using Microsoft Azure Multi-Factor Authentication (MFA) and AD FS. You need to ensure that you can select MFA as the primary authentication method for AD FS. Which three actions should you perform in sequence? (To answer move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Actions	Answer Area
Add a claims provider trust.	1. <div style="border: 1px solid black; height: 25px; width: 100%;"></div>
Run the New-AdfsAzureMfatenant Certificate cmdlet.	2. <div style="border: 1px solid black; height: 25px; width: 100%;"></div>
Run the New-MSolServicePrincipal Credential cmdlet.	3. <div style="border: 1px solid black; height: 25px; width: 100%;"></div>
Edit the authentication methods.	
Run the Set-AdfsAzureMfaTenant cmdlet.	

Answer:

Actions	Answer Area
Add a claims provider trust.	1. <div style="border: 1px solid black; padding: 2px;">Run the New-AdfsAzureMfatenant Certificate cmdlet.</div>
	2. <div style="border: 1px solid black; padding: 2px;">Run the New-MSolServicePrincipal Credential cmdlet.</div>
	3. <div style="border: 1px solid black; padding: 2px;">Run the Set-AdfsAzureMfaTenant cmdlet.</div>
Edit the authentication methods.

NEW QUESTION 202

Hotspot

Your network contains an Active Directory domain named contoso.com. A user named User1 and a computer named Computer1 are in an organizational unit OU1. A user named User2 and a computer named Computer 2 are in an OU named OU2. A Group Policy object (GPO) named GPO1 is linked to the domain. GPO1 contains a user preference that is configured as shown in the Shortcut1 Properties exhibit:

The image shows a Windows-style dialog box titled "Shortcut1 Properties". It has a close button (X) in the top right corner. Below the title bar, there are two tabs: "General" (selected) and "Common". The "General" tab contains the following fields:

- Action:** A dropdown menu with "Update" selected.
- Name:** A text box containing "Shortcut1".
- Target type:** A dropdown menu with "File System Object" selected.
- Location:** A dropdown menu with "Desktop" selected.
- Target path:** A text box containing "C:\Windows\System32\notepad.exe".
- Arguments:** An empty text box.
- Start in:** An empty text box.
- Shortcut key:** A dropdown menu with "None" selected.
- Run:** A dropdown menu with "Normal Window" selected.
- Comment:** An empty text box.
- Icon file path:** An empty text box.
- Icon index:** A text box containing "0".

At the bottom of the dialog box, there are four buttons: "OK", "Cancel", "Apply", and "Help".

Item-level targeting for the user preference is configured as shown in the Targeting Editor exhibit:

Targeting Editor

New Item ▾ Add Collection Item Options ▾ Delete Help

The DNS computer name is contoso.com

Computer name

☐ NetBIOS
☒ DNS

A Computer Name targeting item allows a preference item to be applied to computers or users only if the computer's name matches the specified computer name in the targeting item. [Additional information...](#)

OK Cancel

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Answer Area

Statements	Yes	No
If User1 signs in to Computer1, Shortcut1 will appear on the desktop.	<input type="radio"/>	<input type="radio"/>
If User1 signs in to Computer2, Shortcut1 will appear on the desktop.	<input type="radio"/>	<input type="radio"/>
If User2 signs in to Computer1, Shortcut1 will appear on the desktop.	<input type="radio"/>	<input type="radio"/>

Answer:

Answer Area

Statements	Yes	No
If User1 signs in to Computer1, Shortcut1 will appear on the desktop.	<input checked="" type="radio"/>	<input type="radio"/>
If User1 signs in to Computer2, Shortcut1 will appear on the desktop.	<input checked="" type="radio"/>	<input type="radio"/>
If User2 signs in to Computer1, Shortcut1 will appear on the desktop.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 203

Your network contains an Active Directory domain named contoso.com. The domain contains two domain controllers named DC1 and DC2. DC1 holds the RID master operations role. DC1 fails and cannot be repaired. You need to move the RID role to DC2.

Solution: On DC2, you open Windows PowerShell and run `Move-AddirectoryServerOperationMasterRole -OperationMasterRidMaster -Identity DC2.Adatum.com`. Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

You would need to use the `-Force` parameter because the server that held the role (DC1) is offline.
